PROFESSIONAL SUMMARY

Full-stack Software Engineer with hands-on experience shipping AI-powered SaaS products, enterprise integrations, and data-driven web applications. Currently building third-party connectors and platform features for the agentic AI platform at **FlowGenX AI**. Previously led front-end development at **Affpilot AI**, an AI-powered content automation SaaS used by **90,000+ global users**. Strong across the JavaScript/TypeScript ecosystem (React, Next.js, Node.js, Express) and Python (FastAPI), comfortable owning end-to-end delivery — from database and API design through UI, deployment, and production operations.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, C
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn UI, Material UI, Chakra UI, DaisyUI
State	Redux Toolkit, React Query, Zustand, Context API
Backend	Node.js, Express.js, FastAPI, Bun.js, Elysia.js
Database	PostgreSQL, MySQL, MongoDB, Supabase, Redis, Prisma, Drizzle ORM, Mongoose
Auth & Sec.	JWT, OAuth 2.0, Google OAuth, ClerkAuth, Passport.js
DevOps & Cloud	Docker, PM2, Nginx, GitHub Actions, Vercel, Railway, Render, Firebase
AI & APIs	OpenAI (gpt-4o-mini), Together AI (Flux Schnell), Stripe, Google OAuth, Amazon Creators API, Node-mailer
Testing	Jest, React Testing Library, Postman
Tools	Git, GitHub, Figma, Notion, VS Code

EXPERIENCE

FlowGenX AI

Software Engineer — Gen AI

Dec 2025 – Present

Remote — San Francisco, CA, USA

- Working on an agentic AI platform that enables enterprises to deploy intelligent AI agents for multi-agent coordination, universal API connectivity, and knowledge-base management under enterprise-grade security.
- Building and shipping third-party integration connectors — **Google Sheets, Google Ads, Meta Ads, PayPal, Dropbox, Google Pub/Sub, and Airtable** — so businesses can orchestrate complex workflows across their existing tools.
- Maintaining and enhancing the core platform built with **Next.js**, focused on stability, performance, and scale as the customer base grows.
- Shipping new features and resolving platform-wide bugs to improve reliability and developer experience for customers integrating the agents into real workflows.

Affpilot AI

Full-Stack Developer (Front-End Focused)

Mar 2025 – Dec 2025

Dhaka, Bangladesh

- Led front-end development of the Affpilot AI platform — an AI-powered content automation SaaS used by **90,000+ global users** for generating SEO-optimized articles, product reviews, biographies, comparisons, and informational content.
- Drove front-end architecture using **React.js, TypeScript, and Tailwind CSS**, ensuring seamless scalability and performance across dashboards serving high-volume users.
- Built interactive dashboards for bulk article generation (up to **1,000 articles in one click**), SEO keyword research and grouping, paragraph rewriting, sentence correction, and FAQ generation.
- Integrated RESTful APIs for content generation, keyword analysis, and real-time job tracking across multiple specialized content generators (Amazon reviews, biographies, comparisons, informational articles).
- Implemented one-click auto-publishing to **WordPress and Blogger** with scheduled post queues and real-time status updates.
- Collaborated cross-functionally on the **AppSumo global launch**, owning onboarding flow and multilingual UI/UX for a world-wide audience.
- Improved code modularity and component reusability through shared hooks and component libraries, reducing front-end code redundancy by **25%**.

AdsPillar (PlanPost AI)

Software Developer

Jun 2024 – Feb 2025

Dhaka, Bangladesh

- Contributed to PlanPost AI, an AI marketing assistant that generates 30 days of social media posts, ad copy, graphics, and

videos in seconds to help businesses streamline content creation.

- Developed backend APIs with **Python (FastAPI)** powering the bulk social media post generator, AI ad creative generator, and AI agent chatbot for customer engagement.
- Crafted responsive UIs with **React.js** for content scheduling, campaign dashboards, and media preview interfaces.
- Designed and launched *Canvas*, a manual graphics design tool inspired by Figma and Canva, supporting layered objects, text editing, and multi-format export.
- Integrated AI-assisted media rendering workflows and implemented scalable client-server communication models; enhanced backend performance, reducing API latency by **40%**.

AdsPillar

Software Developer Intern

Feb 2024 – May 2024

Dhaka, Bangladesh

- Supported full-stack development of internal projects using **React.js**, **Node.js**, and **Python**.
- Participated in Agile sprints, performed debugging, and contributed to QA testing pipelines.
- Assisted in integrating third-party APIs and improved code efficiency through refactoring legacy modules.

NOTABLE PROJECTS

Doetra — AI SEO Article Generator

Solo build • Full-stack SaaS, live in production

<https://app.doetra.com>

- Solo-built full-stack AI SaaS with **five article flows** — product Roundup reviews, Info (educational) articles, Outline-to-Article, plus **bulk Roundup** and **bulk Info** batch jobs with queue-based async processing and live status tracking.
- **AI stack:** **OpenAI gpt-4o-mini** for text generation; **Together AI's Flux Schnell** (*FLUX.1-schnell*) for featured and inline section images. Live **Amazon Creators API** integration across 31 search indexes with in-stock filtering and per-site affiliate tag management.
- **WordPress integration:** one-click auto-publishing with **publish / schedule / draft** status, categories, featured images, and inline image uploads via the `/wp-json/wp/v2` REST API; WordPress credentials encrypted at rest with **AES-256-GCM**.
- **Auth & security:** **Google OAuth** + email/password with verification and password reset; JWT access + refresh tokens in httpOnly cookies; **Fingerprint.js** device fingerprinting; Redis-backed per-endpoint rate limiting; Helmet; CORS allow-list.
- **Admin panel:** user management, article moderation, API usage audit, bulk job monitoring, internal blog CMS, and an **email campaign builder** with reusable templates, variable substitution, and per-plan targeting (Nodemailer + Hostinger SMTP).
- **Billing & deploy:** **Stripe** subscriptions + one-time credit packs with signed webhooks; per-article-type credit costs editable live from the admin dashboard; **PM2 cluster mode** (2 instances) with Redis caching; separate Next.js 15 marketing site at doetra.com.
- **Frontend:** React 19, TypeScript, Vite, Redux Toolkit, Tailwind, Radix UI, Tiptap 3.20 rich-text editor with an AI-powered internal linking service between articles.

EDUCATION

Daffodil International University

B.Sc. in Computer Science and Engineering

2016 – 2021

Dhaka, Bangladesh

Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Artificial Intelligence, Computer Networks.

BAF Shaheen College, Tejgaon

Higher Secondary Certificate (Science)

2013 – 2015

Dhaka, Bangladesh
